Professional Experience

10Pearls

Sep 2025 - Present

Senior Software Consultant

1. Worked on SSR support to improve Core Web Vitals for the landing page
2. Identified and fixed memory leaks
3. Successfully did HL7 integration with AWS Lambda functions
4. Maintain and update Angular dependencies
5. Integrated **DataDog** for system monitoring and crash reports analysis
6. Integrated **Statsig** feature flag for beta testing new features for specific customers

Skills: Angular, CoreWebVitals, Azure, Datadog

Rocktech (Doctornow), Streamlined charting for modern medicine
Senior MEAN Stack Engineer

Mar 2024 - Sep 2025

1. Develop new features and mentor junior developers for better/cleaner code in Angular
2. Migrated **CommonJS** codebase to **Typescript** with complete local setup for local development using **Dockers** and **Localstack for AWS**
3. Successfully did HL7 integration with AWS Lambda functions
4. Maintain and update Angular dependencies
5. Integrated **DataDog** for system monitoring and crash reports analysis
6. Integrated **Statsig** feature flag for beta testing new features for specific customers

Skills: Angular, HTML, SCSS/CSS, JS, TS, Node, NestJs, ExpressJs, MongoDB, Webpack, Tailwind, Jest

Next Sapient, Biotechnology Research Houston , Texas
Senior MEAN Stack Engineer (Contractor)

April 2022 – Mar 2024

1. Design and develop scalable and maintainable software solutions using the MEAN stack (MongoDB, Express, Angular, and Node.js)
2. Collaborate with cross-functional teams to define, design, and ship new features
3. Write and maintain high-quality code using modern development practices, such as test-driven development (TDD) and continuous integration/delivery (CI/CD)
4. Troubleshoot and debug issues, identify root causes, and implement solutions to prevent future occurrences
5. Participate in code and design reviews to ensure the team is delivering high-quality software
6. Participate in agile development processes and contribute to project planning and estimation activities
7. Contribute to the development of technical documentation, such as API guides and design documents.

Skills: Ionic, Capacitor/Cordova, Angular, HTML, SCSS, Nest-Js, MongoDB, Dockers

HardStone Enterprises, Township LHR
Senior Front-End Engineer

Nov 2021 – April 2022

Working as an Angular developer to create web applications using extensive knowledge of CSS and JS/TS for providing a better user experience. Along with the front-end, I also code in .Net core environment ensuring smooth integration of the back-end with the front-end.

My Duties at Hard Stone include:

- Managing the code base for the front-end applications.
- Work with different Angular UI libraries like Angular Material, Ngx-bootstrap and Ng-Zoro
- Review code and train junior devs with thier code practices
- Communicate with stake-holders and gather requirements for new features
- Deploying code on AKS (Azure Kubernetes).
- Coding in .Net (minimal API) for back-end development.
- Using XMPP to implement a chat
- Coordinating with the QA team to assist in quality assurance on developers part.
- Some of the projects on which I have worked are **Xtheia & Sypore**.

Over my time at this company, I have learned much things about back-end development and I have worked on myteam/code management skills to ensure the application code base is stable and manageable.

Skills: Ionic, Angular, HTML, SCSS, .Net, Kubernets, Postgresql

Viable Logics, Model Town, Lahore
Front End Engineer

Sept 2020 – Nov 2021

At Viable Logic, worked on a multi-million dollar product known as Portal Select using Angular as Front-end. The whole application is centered around the customer user experience.

My Duties at Viable logic included a variety of tasks:

- Convert Mock-up by the design team to Angular components
- Use Angular Elements to share component accross multiple apps
- Re-iterate over specs to improve user experience.
- Handle complex UI logic and statemanagment flow
- Identify and patch UI and logical bugs.
- Ensure clean & maintainable code and best practices are followed.
- Integrate 3rd Party libraries into the application
- Update packages

At Viable logic, I worked directly under the mentorship of a highly skilled mentor with 15+ years of experience in the field of development and got a chance to grow as a front-end engineer.

GCU, Lahore

Feb 2019 – Aug 2020

Associate Software Engineer

- Develop learning management system for students and faculty of CS department in a leading role.
- Used NgRx for statemanagment
- Used .Net for back-end development
- Used Relational Database for persistence

See: LMS

Projects

- **Tambr:** <https://tambr.app>
 - Online booking for businesses serving performing artists. Easy booking and customer management, payment processing, analytics and more.
- **Portal Select:** <https://portal.io>
 - Simple and powerful AV proposal, design, and sales software for professional installers. Portal enables AV integrator to sell more, faster than ever
- **Cyrano:** <https://test.thecyrano.app/>
 - A portal where users can hire professional to guide them through their dating life
- **GCU LMS:** www.lms.gcu.edu.pk
 - Student portal for Computer science department

Skills

Front-End: Angular 2+, Ionic, HTML, SASS, Java-script, Webpack, Babel, Tailwind, Responsive, CSS, Typescript, Bootstrap, UI Design

Back-End: NodeJs, NestJs, .NET, AWS, Firebase, Express.js, MongoDB, Kubernetes, Dockers, Azure
Others: Java, Android, Algorithms, Git, Figma

Contributions/Hobbies

StackOverflow/Discord Contributor for 1 Year. [@YousafRaza](#)

Trying to contribute to the community and help others mostly related to angular and javascript

Leet Coder for 2 Year. [@YousafRaza](#)

I have been a leet coder for past years and I do problem solving in my free time

Education

BSc. Hons in Computer Science (3.4 / 4.0)

Goverment College University, Mall Road, Lahore

2017 - 2021
